

Radiography Report

Owner: Jeremy Barwick

9/22/2021

Horse: Rebel Rouser Rose

Radiographic Findings

Front Feet: DP, lateral, 60 degree DP, and navicular skyline views were taken of left and right front feet. No significant issues were noted.

Fetlocks: DP and lateral views were taken of both hind fetlocks. No significant issues were noted.

Hocks: DP, lateral, DLPMO, and DMPLO views were taken of both hocks and no significant issues were noted involving the hock joints but a mineralization was noted below the right hock in the area of the attachment of the upper suspensory ligament.

Stifles: Ca-Cr and CaL-CrMO views were taken of both stifles. No significant issues were noted.
